- Victim service programs provide essential, quality services to local communities.
- Due to state and federal funding cuts, nine victim service programs have been closed since 2002.
- Governor Culver, for programs to maintain funding and services at the current level, a \$4 million state appropriation is essential. We are asking you to include this in your budget.
- Without the appropriation as many as nine programs will close, leaving 7019 victims of violence without support.
